Topics

- Review Selector (again)
- Sudo-Classes
    - Link
    - Hover
    - Visited
    - Active
- Nested Element with Space
    - Sudo-classes
        - First-Child
        - Nth-child(N)

Selector ◄------ .color {

    color: red;

}

What is Selector?

Which selects HTML elements in the page.

```
Selector : sudo-class {
    property: value;
}
```

Sudo - Classes

You can write sudo class using ":" after any selector.

Mostly sudo-class represents state of anything.

Selector : sudo-class {
    property: value;
}

Sudo - Classes

You can write sudo class using ":" after any selector.

Mostly sudo-class represents state of anything.

Selector : sudo-class {

   property: value;

}

a: hover {

   background-color: yellow;

}

Sudo - Classes

You can write sudo class using ":" after any selector.

Mostly sudo-class represents state of anything.

Selector : link a: link{ } a { }   <a> Hello World Hello World

Selector : hover a: hover{ }

Selector : active a: active{ }

Selector : visited a: visited{ }

Selector : first-child

Selector : nth-child(N) 1 based index

Sudo - Classes

You can write sudo class using ":" after any selector.

Mostly sudo-class represents state of anything.

CSS Selectors = jQuery Selectors

CSS minimizes 80% of jQuery learning effort.

Questions / Feedback ?

Thank you for watching
